

LUXURY OUTDOOR KITCHENS

Once you have chosen a Kamado that suits you best, it naturally deserves a prominent place in your garden or canopy. You can choose to place your Kamado on a mobile base, but an outdoor kitchen gives your Kamado much more body! With an outdoor kitchen from YAKINIKU®, your garden will immediately radiate a cosy and professional atmosphere. Our outdoor kitchens are made of high-quality materials and give your Kamado a beautiful and present place in your garden. In addition, an outdoor kitchen gives you enough space to prepare several dishes at once and, of course, you can store all your accessories easily and dry.

Our outdoor kitchens are made of powder-coated steel, which gives the kitchen a tough look. In addition, the steel is galvanised, a protective coating that protects steel from rust. The kitchens come complete with a base board, girder, back board and legs. The kitchen worktop is made of sintered stone this has several advantages. It is resistant to freezing, heat, discolouration and scratches. It is also easy to clean and, not unimportantly, it looks tough! The sintered stone has a concrete look, turning your outdoor kitchen into a mega-sturdy kitchen.

Our outdoor kitchens are available in different sizes and designs, so there is a suitable outdoor kitchen for every garden. The outdoor kitchens are modular and can all be combined effortlessly. So there is always a suitable outdoor kitchen combination for you.
